Cybersecurity Assessment

Mitigate security risks with expert insights and recommendations tailored to your IT infrastructure

WHAT IS A CYBERSECURITY ASSESSMENT?

EveryCloud has used its expertise and industry experience to bring together a comprehensive, vendor and solution agnostic security assessment designed to help **highlight the gaps** and **prioritise security best practices** in any business.

EveryCloud leverages the National Institute of Standards and Technology's Cyber Security Framework (NIST CSF 2.0) which is an industry recognised framework designed as a tool to provide in-depth risk based gap analysis to help organisations understand their current security posture and build the foundation for any organisation to develop and improve their security maturity.

WHAT CAN YOU GET FROM OUR ASSESSMENT?

Service Deliverables

High Level and Lower Level reports generated aiming to provide an output for board members and IT/security teams.

Vendor & Solution Agnostic

The consultative approach for our assessment is not based on specific vendors but understanding the business needs and risk appetite.

Continuous Improvement

The reports and resources available to help quantify improvements and track progression for your organisation.

Prioritisation

The risk based approach of our assessment helps identify and prioritise your business specific needs.

Gap Analysis

Understanding the current profile of your business and aligning areas of improvement helps quantify your efforts in your cybersecurity maturity.

Cost Optimisation

Where appropriate we address areas of consolidation and overlap to help optimise costs and streamline operations.

87% Of organisations have experienced an attempted exploit of a known, existing vulnerability
